

2026B EAVN OBSERVING PROPOSAL COVER SHEET

**Note: Please use the latest version of the format and fill information properly; older version and incorrect usage of each item will be subject to reject your proposal.*

1. Title of proposal: PROPOSAL TITLE HERE								
2. Authors: (*Note: PI on the 1st line. Additional authors more than 8 should be listed in the additional page with the same format.)								
Name	E-mail	Affiliation/Country				Student		
Name of author 1	E-mail of author 1	Affiliation of author 1				No		
Name of author 2	E-mail of author 2	Affiliation of author 2				No		
3. Proposal type: <input type="checkbox"/> Normal proposal <input type="checkbox"/> ToO proposal <input type="checkbox"/> Continuation <input type="checkbox"/> Recovery *Related proposal ID (if any): <u> e.g., EAVN26A-XXX </u>								
4. Telescopes: KaVA + <input type="checkbox"/> Nobeyama (shared risk) <input type="checkbox"/> Takahagi <input type="checkbox"/> Hitachi+Yamaguchi <input type="checkbox"/> Sejong (shared risk) <input type="checkbox"/> Non-EAVN telescope(s)								
5. Special observing mode: <input type="checkbox"/> Fast switching (FS) <input type="checkbox"/> K/Q-band simultaneous (MF) <input type="checkbox"/> Dual polarization (2pol; shared risk) <input type="checkbox"/> Wide-field imaging <input type="checkbox"/> KVN Hybrid mode								
6. Scientific categories: <input type="checkbox"/> Evolved star <input type="checkbox"/> Star formation <input type="checkbox"/> Milky Way Galaxy <input type="checkbox"/> Other Galactic object [(keyword)] <input type="checkbox"/> AGN/SgrA* <input type="checkbox"/> Astrometry <input type="checkbox"/> Geodesy <input type="checkbox"/> Others extragalactic object [(keyword)]								
7. Observing setup:								
Telescope	Band	TI	FS	MF	2pol	Hours/epoch	Num. of epoch	Min/Max separation
KVN	C/K/Q/KQ	Y/N	Y/N	Y/N	Y/N			
VERA	C/K/Q/KQ	Y/N	Y/N	Y/N	Y/N			
Nobeyama	K/Q	Y/N	—	—	—			
Takahagi	K	Y/N	—	—	Y/N			
Hitachi+Yamaguchi	C	Y/N	Y/N	—	—			
Sejong	K/Q/KQ	Y/N	Y/N	Y/N	—			
Minimum/maximum LST: 00:00:00 - 24:00:00 (station: ***)								
8. Abstract (200 words max) ABSTRACT HERE								

Title of Proposal:
PROPOSAL TITLE HERE

9. Recording format: 16 MHz × 16 ch 32 MHz × 8 ch 128 MHz × 2 ch (KaVA only)
Recording rate: EAVN 1 Gbps If KVN Hybrid mode: 2 Gbps 4 Gbps 8 Gbps

10. Observing sources (incl. calibrators): total number [*Note: Please attach list if necessary.]

Name	Coordinates (J2000)		Approx. Frequency (MHz)	Approx. Flux Density (mJy)	Time Requested (hr)	Cal? (Y/N)
	RA (hh:mm:ss.ss)	DEC (±dd:mm:ss.ss)				
Source name 1	11:22:33.44	+11:22:33.44	22235.080	20.0	30.0	N
Source name 2						
Source name 10						

11. Correlation setup:
 Default (128/512 channels per 16 MHz bandwidth for continuum and spectral line, respectively)
 Special request (if so, please provide following information)
 – Averaging time: 1.6/0.8/0.4/0.2 sec ; Spectral channels per bandwidth: 128/1024/4096/8192

12. Special requirements
 – Telescope:
 – Dates:
 – Frequencies:
 – etc: Other special requirements here (within one line):

13. Attach a scientific justification including figures (max 2 pages) and a technical justification (one page).
 * The minimum font size should be 11 point.
 * Proposers should clarify necessity in a proposal in case that optional observing mode of EAVN (fast switching, K/Q-band simultaneous, dual polarization, etc.) is requested.
 * Proposers should also mention clearly in the proposal on the request for services which exceed a standard one[†] for the EAVN open-use program (refer to p.** of the EAVN Status Report for the 2026B semester). Note that the services are not always provided by EAVN as the proposer requested depending on the status of each EAVN telescope.
[†] ‘Standard services’ correspond to the followings:
 • Frequency setting and backend setup shown in the EAVN status report (SR) (Section 2.4, Tables 6 – 8 of the EAVN SR)
 • Conventional data correlation process by the Daejeon Hardware Correlator (Section 2.6 of the EAVN SR)
 • Privision of correlated data (FITS) and related files (T_{sys} , log file, etc.)
 • Other services shown in the EAVN SR
 * A list of possible non-EAVN telescopes which are expected to join EAVN observations should be shown in the proposal. Participation of non-EAVN telescopes will not be accepted unless those are shown in the proposal.
 * For a recovery proposal, the problems in the previous observations and the necessity of recovery observations should be described clearly.
